How Technology and Innovation Will Shape the Future of Care

Katy Fike, PhD
Co-Founder, Aging2.0
Partner, Generator Ventures
Aging Society:
• Increased longevity
• Higher acuity
• Cognitive Impairment
• “Aging in Place”
• Disparate Families

Shortages:
• Geriatricians
• RN / PT / OT
• Caregivers
• Social workers
• LTC beds

Changing Economics:
• Accountable Care
• Funding / reimbursement cuts
• Non-profit funding crunch

How can we do more with less?
Technology: A tool for allocating scarce human to highest value tasks

Aging2.0 is a global innovation network.
Our mission is to connect, educate and support innovators in aging and long-term care.
In just over two years, Aging2.0 has become the leading platform for innovation in the aging space.

Fostering Intergenerational & Interdisciplinary Innovation

Helping you care for others
Family Caregiving
Evermind detects when appliances are switched on and off.

Evermind sends information to the Evermind network.

Depending on your preference, Evermind will send a notification when an appliance is used or not used within a specific period of time.
