

New Law and Updates for Physician Reporting Webinar

Learn new reporting parameters to avoid hefty penalties

Tuesday, February 13, 2018
1:30 – 3:00 p.m., Pacific Time

Hospitals have long been required to report well-defined physician professional review actions and findings, and certain privilege-related actions, when imposed or voluntarily accepted for a medical disciplinary cause or reason. However, in recent years, reporting obligations have been impacted by new requirements set forth in California Business & Professions Code Section 805.01 and SB 798, which expand the scope of liability for hospital leadership and significantly increase potential fines — up to \$100,000 per incident — for failure to report. Hospitals and other health care providers must also consider changes to National Practitioner Data Bank (NPDB) policy when reporting certain adverse actions.

Learn how the new law and policy changes impact the reporting process, when reporting is necessary, who is required to complete a report and what can happen if there is failure to submit a report to the NPDB or Medical Board of California.

Recommended for

Chief executive officers, chief medical officers, vice presidents of medical affairs, medical staff leaders, chiefs of staff, compliance officers, medical staff services staff and legal counsel.
