

Health Care and Law Enforcement Collaboration Road Map

MHA's road maps provide hospitals and health systems with evidence-based recommendations and standards for the development of topic-specific prevention and quality improvement programs, and are intended to align process improvements with outcome data. Road maps reflect published literature and guidance from relevant professional organizations and regulatory agencies, as well as identified proven practices. MHA quality and patient safety committees provide expert guidance and oversight to the various road maps.

Each road map is tiered into fundamental and advanced strategies:

- **Fundamental strategies** should be prioritized for implementation, and generally have a strong evidence base in published literature in addition to being supported by multiple professional bodies and regulatory agencies.
- **Advanced strategies** should be considered in addition to fundamental strategies when there is evidence the fundamental strategies are being implemented and adhered to consistently and there is evidence that rates are not decreasing and/or the pathogenesis (morbidity/mortality among patients) has changed.

Operational definitions are included to assist facility teams with road map auditing and identifying whether current work meets the intention behind each road map element.

Resources linked within the road map include journal articles, expert recommendations, electronic order sets and other pertinent tools which organizations need to assist in implementation of best practices.

Road map sections	Road map questions (if not present at your hospital or answering no, please see next column for suggested resources)	If specific road map element is missing, consider the following resources:
Interdisciplinary safety team including law enforcement partners	<p>FUNDAMENTAL (check each box if "yes")</p> <p><input type="checkbox"/> The health care organization has an interdisciplinary team involved in developing and overseeing a communication plan with law enforcement to maintain 24-hour operations. Some examples of a communication plan include:</p> <ul style="list-style-type: none"> - Direct communication plan set up between hospital and law enforcement leaders to troubleshoot emergency situations - Public communication strategy established - Health care and law enforcement leaders and frontline staff meet regularly and routinely <p><input type="checkbox"/> The health care organization may contract or set-up an agreement to have law enforcement on site.</p> <p><input type="checkbox"/> The health care organization may include law enforcement in high risk cases or security huddles.</p> <p><input type="checkbox"/> The health care organization has a prior notification of arrival process in place with law enforcement. The process specifies exchange of safety</p>	<ul style="list-style-type: none"> • Health Care and Law Enforcement Collaboration Checklist • Minnesota Terminology List and Definitions • HIPAA Privacy Rule • Minnesota and Federal Statutes and Conditions of Participation <p>Example of health care and law enforcement collaboration at the local level - Avera Marshall Regional Medical Center:</p> <ul style="list-style-type: none"> • MOU • Readiness Calendar • Annual EOP summary • Emergency Operations Plan - Policy • Weapons Policy • Law Enforcement and Blood Draws <p><i>Resource provided by Avera Marshall Regional Medical Center.</i></p>

Road map sections	Road map questions (if not present at your hospital or answering no, please see next column for suggested resources)	If specific road map element is missing, consider the following resources:
Interdisciplinary safety team including law enforcement partners, continued	<p>information. Prior notification before arrival may occur, but is not limited to the following situations:</p> <ul style="list-style-type: none"> - Incarcerated person in need of health care services - Person in a “Not Free to Leave” status needs health care services - Person arriving under a peace officer or health officer authority <p><i>Safety information may include the following: history of violence; history of escape attempts; history of assaultive behavior; indication if assistance by the hospital and/or hospital security is needed; information on other individuals that may try to contact with individual (i.e. family members); and, if known, indication of “Free to Leave” or “Not Free to Leave” status.</i></p> <ul style="list-style-type: none"> <input type="checkbox"/> The health care organization has developed and implemented a security plan. Development and implementation of the security plan should include the following: <ul style="list-style-type: none"> - A designated leader for the security plan - Dedicated time for the designated leader to develop, train staff, implement and review plan - Policies and procedures have been developed to address all aspects of hospital security - If security staff is contracted, hospital will validate that contracting agency has provided appropriate health care training <input type="checkbox"/> The health care organization has a process in place to provide information sharing with law enforcement, which complies with HIPAA and Minnesota Health Records Act. <input type="checkbox"/> The health care organization has a communication process in place with law enforcement to receive the results of a public safety risk assessment conducted on all individuals brought to the hospital by law enforcement. The public safety risk assessment will consider the following: <ul style="list-style-type: none"> - Mobility of the individual - Potential for the individual to become violent <input type="checkbox"/> The health care organization collaborates with the law enforcement organization to ensure a police officer, deputy and/or correction officer is present during the hospital stay if a person is determined to be in “Not Free to Leave” status during the hospital stay due to violence or other public safety factors. The law enforcement organization ensures the officer is in uniform with a level 2 or greater law enforcement 	<ul style="list-style-type: none"> • 144.291 Minnesota Health Records Act • Information Brief, Minnesota House of Representatives: Health Data Collected Without Individual Consent • Joint Commission Written Security Management Plan Requirements • Level 2_400 Bed Hospital Security Plan example • Level 3_100 Bed Hospital Security Plan example
