

ED Volunteers

COVID Return

May 2020

ED Volunteers:

Please read and sign that you understand these additional protocols for your volunteer services. These extra guidelines will stay in place until you are notified otherwise. Thank you for your continued service to bring comfort and joy to our patients, staff, and visitors.

In addition to the KP Volunteer Compliance guidelines:

- Your temperature will be checked upon arrival
- You must be 100% well. No coughs, shortness of breath, fever.
- You must not have had recent exposure to COVID-19 within the last 14 days.
- You must wear a mask.
 - Mask must be worn properly according to mask instructions provided below.
- You must wash hand before and after your shift.
- You must wipe down the shared equipment after each use with the sanitizing wipes found in the piano bench.
- You must wash hands or use sanitizer if you touch anything except your own belongings.
- Do not enter a room unless the RN has given permission
- Must check-in with Charge RN or POD RN each shift to inquire about changes
- May not clean rooms
- Always be respectful and try and provide social distancing when possible
- Do NOT ENTER C POD
- Do not stock PPE in public areas – however you can offer masks to individuals
- Round on Patients/family in the hallways – offer masks to those who do not have one
- I listened to the hour-long training meeting held by the ED RN Committee who explained in detail all of these new guidelines.

Mask Protocol

What is the proper way to wear a mask?

The most important thing is that it needs to cover your nose and mouth. The virus comes out of your mouth and nose, and the mask prevents virus droplets from landing on someone else.

What is the proper way to put it on and take it off?

Wash your hands before either instance. Take it off and put it on from the back, so you are not touching the front. Avoid touching the front of your facial covering or mask, and if you do, wash your hands.

What is the wrong way to wear a mask?

Don't tug it down to your chin and put it back up, which people do. If you tug it down, your nose and mouth may come in contact with the dirty side, and you are at risk of contaminating yourself. And don't turn it inside out. You're catching germs on the front of the mask, so if you turn it inside out, you are possibly exposing yourself to contaminants.

X DON'T wear your mask below your nose.

X DON'T wear your mask loosely with gaps on the side.

X DON'T wear your mask so your chin is exposed.

X DON'T wear your mask around your neck.

X DON'T wear your mask inside out.

✓ DO wear your mask all the way up, close to the bridge of your nose, and all the way down under your chin. Tighten the loops so it's snug against your face with no gaps.

KAISER PERMANENTE.

COVID Return

Who does a mask protect — me, other people, or both?

Both. You are protecting yourself from others who may not be wearing a mask, where you can't maintain social distance of 6 feet. And you are protecting others around you.

A mask also protects the environment around you, such as surfaces where the virus can live if you cough or sneeze.

When I wear a face mask, do I still have to wash my hands and stay away from other people?

Yes. Wearing a face covering is one way to reduce the spread of the virus but doing so is not a substitute for sheltering in place, physical distancing of at least 6 feet, and frequent hand washing.

If I use a dust mask or an N95 mask, how long can I use it, and should I clean it? What about homemade masks or scarves?

For any of those manufactured masks, you can keep wearing them as long as they are not visibly soiled, damaged, or wet. Once they get wet, they are no good. You don't clean or wipe them with anything; that will ruin the mask, too.

For all masks, whether they are manufactured or homemade, you can do natural decontamination. If you let it sit for up to 3 days, that should do the trick. While it's sitting, you can alternate among other masks. Wash a cloth mask.

Do I need to wear a mask outdoors, such as in parks or open spaces?

That depends on your county. Some counties have different requirements. For the most part, if you stay 6 feet away from people, you don't need to wear a mask.

Do I need to wear a mask while driving?

Don't use it in your car. If you are in your car, it's a self-contained environment, and you don't need to wear it.

I have read and understand the Post COVID-19 protocols for Lobby Musicians and agree to adhere to the extra precautions along with KP Volunteer Compliance Regulations.
